Web Developer and Graphic Designer with an extensive background in management and a successful transition into the technology industry. Offering extensive expertise in JavaScript, HTML, and CSS, combined with exceptional leadership abilities and a broad educational background.

Work Experience

08/2020 -
Current

Owner, Web Developer & Graphic Designer

KCarrEnterprises

- Full stack web development and implementation of multiple websites and online applications
- Collaboration with local artists and authors to bring their creative visions to life online
- Deep historical research into medieval population demographics used to develop a map of a fictional continent analogous to Europe in 1200AD
- Development of large scale map using Adobe Illustrator in "John Speed" historical art style.

06/2017 -
12/2020

Program Manager

San Diego Regional Center for Developmental Disability Services

- Direct supervision to 13 Service Coordinators working with over 1000 individual clients and families with developmental disabilities in the East County, San Diego area
- Proposed and implemented a new digital database system along with Chief Information Officer which allowed for Wiki based updating of policies and procedures as well as allowing for movement to a "paperless" all-digital agency
- Requested by the Executive Director to serve as 1 of 12 representatives on the legislative advisory committee. Directly interfaced with local political representatives to address the concerns of people with developmental disabilities at a legislative level
- Interfaced regularly with community partners such as PERT (psychiatric emergency response team), Adult Protective Services, local site based and community based developmental skills day programs and licensed group homes for those with developmental disabilities.

08/2012 -
06/2017

Social Work Counselor / Service Coordinator

San Diego Regional Center for Developmental Disability Services

- Provided case management for 75+ clients with developmental disabilities who live in group home residential settings.
- Created and developed a Wiki-based document and training platform now used throughout the agency. This platform allowed the agency to transition to a paperless format as well as revolutionizing the agency's new hire training programs
- Organized and facilitated regular planning team meetings in which person centered planning is used to set outcome goals and determine appropriate service needs.
- Worked with local schools, hospitals, skilled nursing facilities, police / emergency and other community agencies to more effectively assist clients with developmental disabilities.
- One of six staff picked to complete first run of "Emerging Leaders" training program through Non-Profit Management Solutions
